OC - 0664-86

11 July 1986

NOTE FOR: Chief, OC-MPS

VIA: C/OPS
DD/CO

FROM: D/CO

At lunch with Ed Maloney today, I agreed to following:

1) Sometime in the fall we would have a joint Office conference that would concentrate on key programs and interfaces between programs--basically "get to know you session". OC would arrange for a day or two [redacted] please contact [redacted] [redacted] to develop an appropriate agenda.

2) If first meeting goes well, have second meeting in fall with senior officers only to discuss joint strategic plans and programming. [redacted] please discuss possible agenda items and participation with [redacted]

3) Would take a look at domestic testbed, possibly at [redacted] where OC and OIT could jointly try to develop some new applications, software, etc., which would be appealing to DO and other customers in the field. The thought was that the testbed should be located some place where it would also be a testbed for a node on MERCURY switch so we could do some neat things with software and connectivity. We could then do a testbed in the field [redacted] should kick items around with [redacted]

4) These are just general items. No final commitments have been made until [redacted] can talk about it, and so can we in the Front Office.
